

## FO72 - Animal Handling (Rev. 0)

	YES	N/A	LOI OBSERVED
1.			Engineering and administrative controls have been maximized where possible to reduce the need for hands-on, manual manipulation of dangerous animals. Where possible, remote handling tools, traps, or cages are used to manipulate dangerous animals.
2.			Worker has received documented training on the handling and manual manipulation of the target animal(s). Documentation of training has been provided to the assigned competent person.
3.			Worker has been informed of potential biohazards related to handling or manipulating the target animal(s).
4.			All necessary personal protective equipment is provided to protect the worker from animal bites or scratches and from exposure to animal biohazards or pathogens.
5.			Sharps, such as hypodermic needles, scalpels or knives related to animal collections, manipulations, or processing are cleaned or disposed of properly.
6.			Biohazardous wastes such as blood and animal tissues are disposed of properly.
7.			Are employees wearing safety glasses with side shields?
